# SUB12

The Sub12 is a powerful subwoofer designed to extend the low frequency capabilities of any near or midfield monitoring system down to 22 Hz.

## Optimized for accurate bass output

A sturdy special woofer with extended cone travel and a heavy-duty coil have been optimized for accurate reproduction from a bass reflex enclosure. The down-firing bass reflex tube avoids intrusive ventilation noise because of its generous size and shape. The PWM amplifier produces over 90% efficiency and can handle critical passages without overheating for long periods of time. An additional output allows you to cascade as many subwoofers as needed.

The Sub12 subwoofer provides a precise combination of low cutoff frequency (-3 dB at 22 Hz) and an undistorted high sound pressure level (115 dB SPL at 1 m).

## Basic technical data

- 12" Subwoofer [paper]
- Amp. Power RMS / Music:  
200 W / 300 W
- 22 Hz - 150 Hz
- Max. peak SPL at 1 m:  $\geq$ 115 dB
- 5 Year Warranty

## Reviews & Testimonials

Moreover, the Sub12 sounds extremely tight, without the distraction of a lesser subwoofer's harmonic distortion and resonances, which when heard, will immediately clue your ears to the location of the subwoofer.

### [Andy Hong / TAPEOP]

For 3 years I tried other models in the same price range, or slightly more expensive. This is the one I liked. I enjoy being able to dispense the volume and ability to select frequency cutoff (some sub, 85 Hz is only available on the ADAM you can choose).
