Functional and easy to use sound improvement!

Upgrade your *RPM 3 Carbon* turntable with *Acryl it RPM 3 Carbon*. *Acryl it RPM 3 Carbon* is made from acrylic with satinised surface and brings a more liquid sound that leaves no space for platter resonances.

The change is easily made: just exchange your MDF platter for *Acryl it RPM 3 Carbon*; with built-in inverted bearing housing. . Unlike many platters, where you will need to place a felt mat between record and platter to damp metal resonance, you can put your record directly on the acrylic surface, with nothing in-between.

Acryl it RPM 3 Carbon is able to improve overall performance significantly and will additionally upvalue your turntable optically! !
