WI-LIGHT

Wi-Light on your phone is an easy and powerful wireless remote control for the LED Player and the LPSA-WIFI interface. It commands all the Live Board and the stand Alone controls via a WIFI local network connection. For all smart-phones and tablets

LED PLAYER SOFTWARE

It is the ideal controller for all DMX applications (Architectural and Stage Lighting). It controls any type of DMX fixture and can write a show in the Chromateq interfaces. LED Player is the most user friendly and affordable solution for DMX lighting control.

CHROMATEQ DMX PACKAGES AND INTERFACES

They are the ideal DMX512 Packages for all Architectural projects, Live performances or fixed installations, thanks to their ability to configure scene triggers and save a show in to the memory of the interfaces. Each interface comes with 24 months of international guarantee and any free software updates. Packages include 1 CDrom + 1 USB cable + 1 USB or WIFI interface + Power supply (LPSA family only).
