Version: 1.2

EN - DISPOSAL OF THE DEVICE

Dispose of the unit and used batteries in an environment friendly manner according to your country regulations.

FR - DÉCLASSER L'APPAREIL

Débarrassez-vous de l'appareil et des piles usagées de manière écologique conformément aux dispositions légales de votre pays.

NL - VERWIJDEREN VAN HET APPARAAT

Verwijder het toestel en de gebruikte batterijen op een milieuvriendelijke manier conform de in uw land geldende voorschriften.

DU - ENTSORGUNG DES GERÄTS

Entsorgen Sie das Gerät und die Batterien auf umweltfreundliche Art und Weise gemäß den Vorschriften Ihres Landes.

ES - DESHACERSE DEL APARATO

Reciclar el aparato y pilas usadas de forma ecologica conforme a las disposiciones legales de su país.

PT - COMO DESFAZER-SE DA UNIDADE

Tente reciclar a unidade e as pilhas usadas respeitando o ambiente e em conformidade com as normas vigentes no seu país.

OPERATION MANUAL

Thank you for buying this Briteq® product. To take full advantage of all possibilities and for your own safety, please read these operating instructions very carefully before you start using this unit.

FEATURES

- High efficiency moving head projector based on a powerful 270W LED engine!
- Wide range electronic zoom, from 8° to 45° + motorized focus.
- Silence mode for theater applications.
- Fast 540° pan and 270° tilt movements.
- 16bit resolution pan/tilt resolution with position correction and pan/tilt speed channel.
- CMY color mixing to create lots of saturated and pastel colors.
- 9 extra fixed colors including 2 CTO, one CTB and UV.
- 7 replaceable rotating gobos with fine indexing.
- 9 fixed static gobos for gobo morphing.
- Rotating 3 facets prism.
- Iris module for dynamic effect.
- Variable frost filter for perfect wash effect.
- Aperture diaphragm for excellent logo projection.
- Opening/closing pulse, ramp and random effects on zoom, iris and frost channels.
- Four dimmer curves: linear, square, inverse square, S-curve, fast and slow dimming mode.
- Accurate strobe with built in random, pulse and burst effects.
- 3 focus compensate distances to always keep the focus according to the zoom opening.
- Uses 25 DMX channels + RDM-functionality for easy remote setup.
- Easy USB firmware update to keep the moving head up-to-date at all times.
- The matrix LCD-display assures easy navigation in the different setup menus
- 3 & 5pin DMX in/outputs + Neutrik PowerCON TRUE1 in/outputs for easy daisy chaining.
- Equipped with omega brackets for fast installation.

BEFORE USE

- Before you start using this unit, please check if there's no transportation damage. Should there be any, do not use the device and consult your dealer first.
- **Important:** This device left our factory in perfect condition and well packaged. It is absolutely necessary for the user to strictly follow the safety instructions and warnings in this user manual. Any damage caused by mishandling is not subject to warranty. The dealer will not accept responsibility for any resulting defects or problems caused by disregarding this user manual.
- Keep this booklet in a safe place for future consultation. If you sell the fixture, be sure to add this user manual.

Check the contents:

Check that the carton contains the following items:

- English operating instructions, other languages can be downloaded from our website.
- BTX-SATURN
- 2 Omega brackets
- PowerCON TRUE1® mains cable

Safety instructions:

CAUTION
RISK OF ELECTRIC SHOCK
DO NOT OPEN

CAUTION: To reduce the risk of electric shock, do not remove the top cover. No user-serviceable parts inside. Refer servicing to qualified service personnel only.

The lightning flash with arrowhead symbol within the equilateral triangle is intended to alert the user to the presence of un-insulated "dangerous voltage" within the product's enclosure that may be of sufficient magnitude to constitute a risk of electric shock.

The exclamation point within the equilateral triangle is intended to alert the user to the presence of important operation and maintenance (servicing) instructions in the literature accompanying this appliance.

This symbol means: indoor use only

This symbol means: Read instructions

This symbol determines: the minimum distance from lighted objects. The minimum distance between light-output and the illuminated surface must be more than 1 meters

RISK GROUP 2
CAUTION:
Do not stare at operating lamp

CAUTION: Do not stare at operating lamp.
May be harmful to the eyes.

- To protect the environment, please try to recycle the packing material as much as possible.
- To prevent fire or shock hazard, do not expose this appliance to rain or moisture.
- To avoid condensation to be formed inside, allow the unit to adapt to the surrounding temperatures when bringing it into a warm room after transport. Condense sometimes prevents the unit from working at full performance or may even cause damages.
- This unit is for indoor use only.
- Don't place metal objects or spill liquid inside the unit. Electric shock or malfunction may result. If a foreign object enters the unit, immediately disconnect the mains power.
- Locate the fixture in a well ventilated spot, away from any flammable materials and/or liquids. The fixture must be fixed at least 50cm from surrounding walls.
- Don't cover any ventilation openings as this may result in overheating.
- Prevent use in dusty environments and clean the unit regularly.
- Keep the unit away from children.
- Inexperienced persons should not operate this device.
- Maximum safe ambient temperature is 40°C. Don't use this unit at higher ambient temperatures.
- Make sure the area below the installation place is free from unwanted persons during rigging, de-rigging and servicing.
- Allow the device about 10 minutes to cool down before to start servicing.
- Always unplug the unit when it is not used for a longer time or before to start servicing.
- The electrical installation should be carried out by qualified personal only, according to the regulations for electrical and mechanical safety in your country.
- Check that the available voltage is not higher than the one stated on the unit.
- The power cord should always be in perfect condition. Switch the unit immediately off when the power cord is squashed or damaged. It must be replaced by the manufacturer, its service agent or similarly qualified persons in order to avoid a hazard.
- Never let the power-cord come into contact with other cables!
- This fixture must be earthed in order to comply with safety regulations.
- Don't connect the unit to any dimmer pack.
- Always use an appropriate and certified safety cable when installing the unit.
- In order to prevent electric shock, do not open the cover. Apart from the mains fuse there are no user serviceable parts inside.
- **Never** repair a fuse or bypass the fuse holder. **Always** replace a damaged fuse with a fuse of the same type and electrical specifications!
- In the event of serious operating problems, stop using the fixture and contact your dealer immediately.
- The housing and the lenses must be replaced if they are visibly damaged.
- Please use the original packing when the device is to be transported.
- Due to safety reasons it is prohibited to make unauthorized modifications to the unit.

Important: Never look directly into the light source! Don't use the effect in the presence of persons suffering from epilepsy.

DESCRIPTION:

1. **MAINS INPUT:** equipped with original Neutrik PowerCON TRUE1®. Connect the supplied mains cable or any PowerCON TRUE1® extension cable here.
2. **MAINS OUTPUT:** used to daisy chain the power to several other projectors. Always pay attention to the maximum load while adding projectors! Special Multi cables (PowerCON TRUE1® + DMX XLR-cables are optionally available: see our website!)
3. **MAINS FUSE:** protects the unit in case of electrical problems, always use the prescribed fuse!
4. **DMX IN/OUT:** both 3pin and 5pin in/outputs are available to daisy chain the projector with other units that will be controlled by a DMX-controller.
5. **DISPLAY:** shows the various menus and the selected functions.
6. **◀-button:** used to enter and exit the setup menu or to jump to a higher level in the setup menu (if the display is inverted, this buttons acts as a ENTER button).
7. **▶-button:** used to select a menu option or confirm a setting (if the display is inverted, this buttons acts as a MENU button).
8. **▲-button:** used to go to the previous menu option or to increase a parameter value.
9. **▼-button:** used to go to the next menu option or to decrease a parameter value.
10. **POWER LED:** shows that the unit is powered.
11. **DMX LED:** shows that unit receives DMX signal.
12. **MOUNTING BASE:** the strong metal base is designed to be used with 2pcs "OMEGA BRACKET BIG" (included) and an optional safety cable (use the safety eye).
13. **TILT LOCK :** locks and releases the tilt axis every 45°.
14. **USB-input:** only used for software updates, see further in this user manual.

!!! IMPORTANT: the arm must be unlocked before operation !!!

OVERHEAD RIGGING

Important: The installation must be carried out by qualified service personal only. Improper installation can result in serious injuries and/or damage to property. Overhead rigging requires extensive experience! Working load limits should be respected, certified installation materials should be used, the installed device should be inspected regularly for safety.

1. Make sure the area below the installation place is free from unwanted persons during rigging, de-rigging and servicing.
2. Locate the fixture in a well ventilated spot, far away from any flammable materials and/or liquids. The fixture must be fixed **at least 50cm** from surrounding walls.
3. The device should be installed out of reach of people and outside areas where persons may walk by or be seated.
4. Before rigging make sure that the installation area can hold a minimum point load of 10 times the device's weight.
5. Always use a certified safety cable that can hold 12times the weight of the device when installing the unit. This secondary safety attachment should be installed in a way that no part of the installation can drop more than 20cm if the main attachment fails.
6. The device should be well fixed; a free-swinging mounting is dangerous and may not be considered!
7. Don't cover any ventilation openings as this may result in overheating.
8. The operator has to make sure that the safety-relating and machine-technical installations are approved by an expert before using them for the first time. The installations should be inspected every year by a skilled person to be sure that safety is still optimal.

SETUP MENU / HOW TO SETUP

With the setup menu you can fully configure the projector. All settings are preserved when the unit is disconnected from the mains.

General instructions for setup.

The SETUP-menu has three logically structured levels, see the menu structure.

- Press the ◀ button to enter the SETUP-menu.
- Press the ▲/▼ buttons to browse the different functions of the setup menu until the required function is shown on the display.
- Press the ▶ button to access the function and change its parameters.
- Use ▲/▼ buttons to change the value.
- Press the ▶ button again confirm.
- To jump to a higher menu level: press the ◀ button.
- To exit the SETUP-menu: press the MENU button several times until the standard display is shown.

Remark: to make things easier you will always enter the SETUP-menu at the last used location.

DMX FUNCTION

Used to configure the DMX parameters of the projector.

DMX Address

Used to set the desired DMX-address. (on RDM-compatible controllers this option can be set remotely)

- Press the ▲/▼ buttons until the desired function is showing on the display.
- Press the ▶ button: the values can be changed
- Use ▲/▼ buttons to select the desired DMX512 address.
- Once the correct address shows on the display, press the ▶ button to confirm.

DMX Channel Mode

Used to set the desired channel mode. (on RDM-compatible controllers this option can be set remotely)

- Press the ▲/▼ buttons until the desired function is showing on the display.
- Press the ▶ button: the values can be changed
- Use ▲/▼ buttons to select the desired mode:

- **25Ch** : full control of the moving head, 16bits pan and tilt, dimmer, focus and gobo indexing.
- Once the correct option shows on the display, press the ► button to confirm.

NO DMX Mode

Used to set how the projector reacts when the DMX-signal disappears.

- Press the ▲/▼ buttons until the desired function is showing on the display.
- Press the ► button: the values can be changed
- Use ▲/▼ buttons to select the desired mode:
 - **BLACKOUT**: output turns black while no DMX is detected.
 - **FREEZE**: output based on the last valid DMX-signal is kept on the projector.
- Once the correct option shows on the display, press the ► button to confirm.

Note: as soon as the input detects a DMX-signal, blackout or freeze mode will be cancelled. When no DMX signal is detected, the display start blinking and the DMX LED is off.

LEVEL 1	LEVEL 2	LEVEL 3	
DMX FUNCTION	DMX Address	001 - XXX	
	DMX Channel Mode	25Ch

	Dimmer Mode	Fast	
		Slow	
Silent Mode	Yes/No		
Focus Compensate	Disable		
	Near		
	Medium		
	Far		
DISPLAY SETTINGS	Display Inverse	Yes/No	
	Backlight Switch	Yes/No	
	Backlight Intensity	1 - 10	
	Temperature Unit	°C	
°F			
FIXTURE TEST	Auto Test		
	Manual Test	List of all the DMX channels	
FIXTURE INFORMATION	Fixture Use Time	xxx	
	Temperature	Led / processor A, B, C, D, E	
	USB Upgrading File	Select the firmware on your USB key	
	Firmware Version	Processor A, B, C, D, E	
RESET FUNCTION	Pan & Tilt	Yes/No	
	Effect	Yes/No	
	All	Yes/No	
SPECIAL FUNCTION	Factory Settings	Yes/No	

FIXTURE SETTINGS

Used to configure different parameters of the projector.

Pan Inverse

Used to select if the Pan movements are inverted or not.

- Press the ▲/▼ buttons until the desired function is showing on the display.
- Press the ► button: the values can be changed.
- Use ▲/▼ buttons to toggle between Yes and No.
- Press the ► button to confirm.

Tilt Inverse

Used to select if the Tilt movements are inverted or not.

- Press the ▲/▼ buttons until the desired function is showing on the display.
- Press the ► button: the values can be changed.
- Use ▲/▼ buttons to toggle between Yes and No.
- Press the ► button to confirm.

P/T feedback

This function corrects the PAN/TILT positions automatically if someone bumps into the machine.

- Press the ▲/▼ buttons until the desired function is showing on the display.
- Press the ► button: the values can be changed.
- Use ▲/▼ buttons to toggle between Yes and No.
- Press the ► button to confirm.

BL.O P/T Move

Used to turn off the LED while Pan/tilt movements.

- Press the ▲/▼ buttons until the desired function is showing on the display.
- Press the ► button: the values can be changed.
- Use ▲/▼ buttons to toggle between Yes and No.
- Press the ► button to confirm.

BL.O. Color Move

Used to turn off the LED while changing the position of the fixed color wheel.

- Press the ▲/▼ buttons until the desired function is showing on the display.
- Press the ► button: the values can be changed.
- Use ▲/▼ buttons to toggle between Yes and No.
- Press the ► button to confirm.

BL.O. Gobo Move

Used to turn off the LED while changing the position of the gobo wheels.

- Press the ▲/▼ buttons until the desired function is showing on the display.
- Press the ► button: the values can be changed.
- Use ▲/▼ buttons to toggle between Yes and No.
- Press the ► button to confirm.

Dimmer Curve

Used to set the dimmer curve of the master dimmer.

- Press the ▲/▼ buttons until the desired function is showing on the display.
- Press the ► button: the values can be changed.

- Once you have the desired curve, press the ► button to save it.

Silent Mode

Used to turn on the silent mode. When this mode is enabled, the light output is reduced to 80% of the maximum intensity.

- Press the ▲/▼ buttons until the desired function is showing on the display.
- Press the ► button: the values can be changed.
- Use ▲/▼ buttons to toggle between Yes and No.
- Press the ► button to confirm.

Focus Compensate

Used to adjust the focus according to the zoom setting.

- Press the ▲/▼ buttons until the desired function is showing on the display.
- Press the ► button: the values can be changed between Disable, Near, Medium and Far to adjust the focusing distance or to disable this feature.
- Use ▲/▼ buttons to select the desired option
- Once you have the desired option selected, press the ► button to save it.

Display Settings

This level contains all display related settings.

Display Inverse

Used to turn the display over 180°: **Yes = display is upside-down.**

- Press the ▲/▼ buttons until the desired function is showing on the display.
- Press the ► button: the values can be changed.
- Use ▲/▼ buttons to toggle between Yes and No.
- Press the ► button to confirm.

Note: to quickly invert the display, hold down and at the same time the ▲ and ▼ buttons. When the display is inverted, the function of each button is inverted as well to allow easy navigation in the menus.

Backlight Switch

Used to adjust if the display stays lit after the last time it was used. **No = display is always lit.**

- Press the ▲/▼ buttons until the desired function is showing on the display.
- Press the ► button: the values can be changed.
- Use ▲/▼ buttons to toggle between Yes and No.
- Press the ► button to confirm.

Backlight Intensity

Used to adjust the display's intensity between 1 (low intensity) and 10 (high intensity).

- Press the ▲/▼ buttons until the desired function is showing on the display.
- Press the ► button: the values can be changed.
- Use ▲/▼ buttons to set the backlight's intensity.
- Press the ► button to confirm.

Temperature Unit

Used to select if the LED-temperature is shown in degrees Celcius °C or Fahrenheit °F.

- Press the ▲/▼ buttons until the desired function is showing on the display.
- Press the ► button: the values can be changed
- Use ▲/▼ buttons to toggle between °C and °F.
- Press the ► button to confirm.

FIXTURE TEST

This level controls all the testing functions.

Auto Test

Used to start the automatic test function: **all functions will be tested.**

- Press the ▲/▼ buttons until the desired function is showing on the display.
- Press the ► button: the automatic test sequence will begin. When the sequence is over, the display comes back to the FIXTURE TEST menu.

Manual Test

Used to test a particular function of the moving head. When entering in this menu, the pan and tilt will be set in the center position, the intensity will be maximum and the shutter will be open.

- Press the ▲/▼ buttons until the desired function is showing on the display.
- Press the ► button: the display shows all features of the moving head that can be tested.
- Use ▲/▼ buttons to navigate to the feature to be tested.
- Press the ► button to select the required feature.
- Use ▲/▼ buttons to set the parameter between 0 and 255.
- Press the ► button to store the value and come back to the features of the moving head.

Note: exit this menu and the moving head will listen again to its DMX signal or go back to the default position if no DMX signal.

FIXTURE INFORMATION

This level shows all the information relative to the moving head.

Fixture Use Time

Shows how long the projector has been used (in hours).

Temperature

Used to monitor the temperature of the moving head.

- Press the ▲/▼ buttons until the desired function is showing on the display.
- Press the ► button: the display shows the LED and processors temperatures.

USB Upgrade File

Used to upgrade the moving head with a USB key.

- First plug a USB key with the firmware V0.0 (initial firmware) AND the latest firmware V0.xx. The files MUST be located at the root of the USB key.
- Press the ▲/▼ buttons until the desired function is showing on the display.
- Press the ► button: the display shows the 2 firmware versions present on the USB key.
- Use the ▲/▼ buttons to select the firmware V0.0.
- Press the ► button and select Yes to downgrade the moving head to its initial version. The display shows the progression of the installation. Once the downgrade process is finished the moving head resets.
- Use the ▲/▼ buttons to select the new firmware V0.xx.
- Press the ► button and select Yes to upgrade the moving head to the latest version. The display shows the progression of the installation. Once the upgrade process is finished, the moving head resets and is up to date.

Firmware Version

Used to monitor the temperature of the moving head.

- Press the ▲/▼ buttons until the desired function is showing on the display.
- Press the ► button: the display shows the version of each processor.

RESET FUNCTION

Used to reset certain functions of the projector. When the reset is done the display shows the RESET FUNCTION menu again.

Pan & Tilt

Used to reset pan and tilt only.

- Press the ▲/▼ buttons until the desired function is showing on the display.
- Press the ► button: select Yes to reset the pan & tilt.
- Press the ► button to confirm.

Effect

Used to reset color and beam functions only.

- Press the ▲/▼ buttons until the desired function is showing on the display.
- Press the ► button: select Yes to reset the effect section.
- Press the ► button to confirm.

All

Used to reset the entire moving head.

- Press the ▲/▼ buttons until the desired function is showing on the display.
- Press the ► button: select Yes to reset the moving head.
- Press the ► button to confirm.

Note: to quickly reset the entire moving head, press at the same time the ◀ & ► buttons for 3 seconds.

SPECIAL FUNCTION

Used to set special functions.

Factory Settings

This is your emergency exit if you really messed up the settings: just return to the Factory Settings.

- Press the ▲/▼ buttons until the desired function is showing on the display.
- Press the ► button: select Yes to restore factory settings
- Press the ► button to confirm.

Set of Factory default settings:

PARAMETER name	FACTORY defaults
DMX address	001
DMX Channel Mode	25Ch
DMX State	Blackout
Pan Inverse	No
Tilt Inverse	No
P/T Feedback	Yes
BL.O. P/T Moving	No
BL.O. Color Moving	No
BL.O. Color Moving	No
Dimmer Curve	Square Law
Dimmer Mode	Fast
Silent Mode	No
Focus Compensate	Disable
Display Inverse	No
Backlight Switch	Yes
Backlight Intensity	10
Temperature Unit	°C

CALIBRATION MENU

This is a hidden menu where you can fine-tune the offset of several functions. To access this menu do as follows: press the ► button for about 3 seconds while you are in the main menu (any option, not important).

Now the display shows all the features that can be adjusted:

- Press the ▲/▼ buttons until the desired function is showing on the display.
- Press the ► button to select the feature to be calibrated.
- Use ▲/▼ buttons to adjust the value between -128 and 127.
- Press the ► button to confirm the changes.
- Press the ◀ button to exit the hidden menu.

ELECTRICAL INSTALLATION

Important: The electrical installation should be carried out by qualified personal only, according to the regulations for electrical and mechanical safety in your country.

Electrical installation for two or more units in DMX-mode:

- The DMX-protocol is a widely used high speed signal to control intelligent light equipment. You need to “daisy chain” your DMX controller and all the connected units.
- Pin layout XLR-3pin: Pin1 = GND ~ Pin2 = Negative signal (-) ~ Pin3 = Positive signal (+)
- To prevent strange behavior of the light effects, due to interferences, you must use a 90Ω to 120Ω terminator at the end of the chain. Never use Y-splitter cables, this simply won't work!
- Make sure that all units are connected to the mains.
- Each unit in the chain needs to have its proper starting address so it knows which commands from the controller it has to decode.

RDM FUNCTIONS / REMOTE SETUP

RDM means “Remote Device Management”. This projector works with a brief set of RDM-functions which means that it can setup a bi-directional communication with an RDM-compatible DMX-controller. Some of these functions are briefly explained below, others will be added in the future.

- The DMX-controller sends out a “discovery command”, all RDM devices respond and send their unique device ID.
- The DMX-controller asks each RDM device for some basic data so it knows which devices are connected. The projector will respond:
 - **Device name:** BTX-SATURN
 - **Manufacturer:** Briteq®
 - **Category:** Moving Yoke
 - **Firmware:** x.x.x.x (firmware version of the projector)
 - **DMX address:** xxx (current DMX start address of the projector)
 - **DMX footprint:** xx (number of DMX-channels used by the projector)
 - **Mode:** xx (current personality or DMX-working mode used by the projectors)
- The DMX-controller can send certain commands to each RDM device which allow remote setup of the units. Thanks to this the projector can be setup remotely.

The following functions can be managed remotely:

No more need to take a ladder and set all units one by one!

- **DMX START ADDRESS:** The start address can be set remotely from 001 to xxx.
- **PERSONALITY:** The DMX working mode (DMX-chart) can be set remotely.

These 2 functions make it possible to prepare a complete DMX-patch of all projectors on the DMX-controller and send these data to all projectors at once. More functions will be added later.

OPERATING INSTRUCTIONS

- Connect all units together. Refer to the chapter “Electrical installation for two or more units in DMX-mode” to learn how to do this (don’t forget to address all units properly!)
- Connect all units to the mains and turn on the DMX controller.
- Since each unit has its own DMX-address, you can control them individually. Remember that each unit can use a different number DMX-channels, depending on the DMX-mode you have selected in the menu. See the different DMX charts:

DMX Chart for the 25Ch DMX-Mode

CHANNEL	VALUE	FUNCTION
1	000-255	Pan
2	000-255	Pan Fine
3	000-255	Tilt
4	000-255	Tilt Fine

ROTATING GOBO

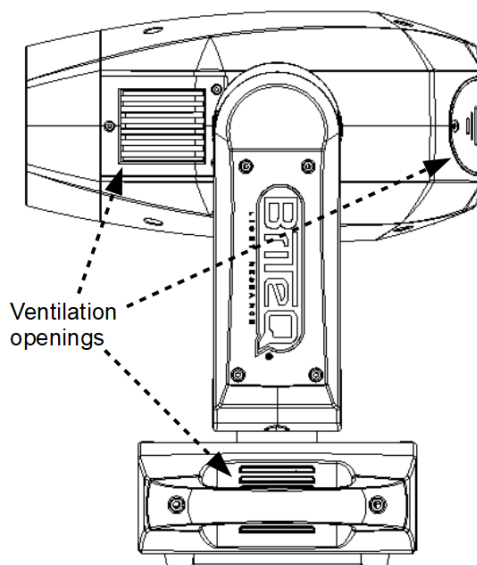

STATIC GOBO

MAINTENANCE

- Make sure the area below the installation place is free from unwanted persons during servicing.
- Switch off the unit, unplug the mains cable and wait until the unit has been cooled down.
- During inspection the following points should be checked:**
- All screws used for installing the device and any of its parts should be tightly fastened and may not be corroded.
- Housings, fixations and installations spots (ceiling, truss, suspensions) should be totally free from any deformation.
- When an optical lens is visibly damaged due to cracks or deep scratches, it must be replaced.
- The mains cables must be in impeccable condition and should be replaced immediately when even a small problem is detected.
- In order to protect the device from overheat the cooling fans (if any) and ventilation openings should be cleaned monthly.
- The interior of the device should be cleaned annually using a vacuum cleaner or air-jet.
- The cleaning of internal and external optical lenses and/or mirrors must be carried out periodically to optimize light output. Cleaning frequency depends on the environment in which the fixture operates: damp, smoky or particularly dirty surroundings can cause greater accumulation of dirt on the unit's optics.
 - Clean with a soft cloth using normal glass cleaning products.
 - Always dry the parts carefully.

Attention: We strongly recommend internal cleaning to be carried out by qualified personnel!

SPECIFICATIONS

This unit is radio-interference suppressed. This product meets the requirements of the current European and national guidelines. Conformity has been established and the relevant statements and documents have been deposited by the manufacturer.

Mains Input:	AC 110 - 240V, 50/60Hz
Power consumption:	392 Watts
Fuse:	250V 6,3A slow blow (20mm glass)
Power connections:	PowerCon True1 input / output
DMX connections:	3&5 pin-XLR inputs / outputs
DMX channels used:	25ch
Lamp:	LED, 270W (CCT 7500K)
Beam Angle:	Electronic zoom 8° ~ 45°
Focus:	Electronic
Color:	CMY color mixing + 9 fixed colors
GOBO wheel 1:	7 rotating gobos, replaceable by metal and glass gobos Outer diameter 26,80 mm – Image diameter: 22 mm
GOBO wheel 2:	9 fixed gobos
Special effects:	Iris, 3-facet rotating prism, frost filter, aperture diaphragm
IP-Rating:	IP20
Operating temperature (T_a):	0°C to 40°C
Installation:	2 quarter turn quick clamps
IP-Rating:	IP20
Size:	See drawing
Weight:	22,7 kg
